Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 21, 2006 has been entered.

Election/Restrictions

Claims 6-84 and 202-259 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

Applicant's election of Group I in the reply filed on February 3, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 193 is rejected under 35 U.S.C. 102(e) as being anticipated by Kreamer (US 5,078,726). Kreamer ('726) anticipates the claim language where the anastomosis site as claimed is the incision made in the femoral artery (see column 3, lines 50-55) to insert the device. It is noted that the method only requires an anastomosis site, which may merely be an opening in a body vessel.

The step of positioning the graft in the delivery device is inherently taught (see column 3, lines 24-36) by incorporated reference US 4,577,631 that uses a protective sleeve to cover the graft and balloons; see column 6, lines 51-66 of the '631 patent. The graft must be positioned in the sleeve prior to delivery in order to carry out the method.

The rolled configuration as claimed is taught by the '726 patent on column 2, lines 27-47.

The advancing step as claimed is done outside the body as the device is advanced towards the insertion site in the femoral artery.

The removing step is explained in the previously cited portion of the '631 patent.

Allowable Subject Matter

Claims 5, 131, 13, 138, 139, 260, 261, and 263 are allowed over the prior art of record.

Conclusion

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.
